Re: Vallejo Mine associated with Hillside-Gizmo-  
Bears Ears-Maybe Complex

Dear Holland:

Pursuant to our conversation of December 6, 1988, I have questioned those people within the Company involved with the development of the Fry Canyon properties in the early 1980's. They inform me that the Vallejo Mine was to be located in the West Valley or Playboy claims (location maps attached), but was never developed. No disturbance occurred as part of the planned Vallejo Mine.

Hopefully this information will allow you to move forward with the re-evaluation of bonding requirements for the Hillside-Gizmo-Bears Ears-Maybe Mine Complex.

If you have any questions or need additional information, please call.

Sincerely,

William J. Almas  
Environmental Coordinator
